APPLICATION FOR HOMEOWNER PERMIT INSTRUCTION SHEET

General Information

- Homeowner permits are required for new construction, renovation, and any work that requires a building permit. Generally, homeowners' permits are not required for replacement in kind.
- **Only owner-occupants who perform the work themselves qualify for homeowner permits.**
- A **single-family dwelling** must be on the site or under construction before a homeowner's permit is issued.
- Homeowner permits will **not** be issued for
 - homes that are for sale or rent
 - condominiums, townhomes, duplexes or commercial buildings (such as apartment complex).
- A homeowner is not permitted to install his or her own internal wiring, electrical work or equipment associated with a hot tub or a swimming pool.
- A homeowner's permit issued for a mobile home on a leased lot authorizes feeder installation for the mobile home itself but does **not** include installation or repair of service equipment.
- If a homeowner permit is approved for a dwelling on a lot, other structures on the same lot, such as a non-commercial garage, are also covered unless prohibited under Section 14.0 of the Board's [Rules and Regulations](#).

Permits are valid for only one year and are not renewable.
