

**Delaware Board of Massage and Bodywork
Approved Continuing Education Courses
for the period ending August 31, 2012**

“Continuing Education must maintain, improve, or expand the skills and knowledge obtained prior to licensure or certification, or develop new and relevant skills and knowledge.”

- For each renewal (8/31 of even years), Certified Massage Technicians (CMT) are required to complete 12 hours of continuing education (CE) unless otherwise stated. Of the 12 hours, 9 are required to be **core** courses (the other 3 can be either core or an elective, as explained below). You can take up to half (6) of your required hours online, but you must still have a maximum of 3 hours in electives.
- For each renewal (8/31 of even years), Licensed Massage Therapists (LMT) are required to have 24 hours of continuing education (CE) unless otherwise stated. Of the 24 hours, 18 are required to be **core** courses (the other 6 can be either core or an elective, as explained below). You can take up to half (12) of your required hours online, but you must still only have a maximum of 6 in electives.
- Explanation of categories (as shown below on listing):

Elective course means a continuing education course with a subject matter that is outside the “practice of massage and bodywork,” which does not directly contribute to the professional competency of the massage/bodywork therapist or massage technician. Elective courses must have one of the following subject matters: modalities outside the “practice of massage and bodywork,” personal growth and self-improvement, business management, anatomy, or physiology. Elective courses can be taken online.

Core course means a continuing education course with a subject matter within the “practice of massage and bodywork,” which contributes to the professional competency of the massage/bodywork therapist or massage technician. Core courses must be designed to maintain, improve, or expand skills and knowledge or to develop new and relevant skills and knowledge. Fifty per cent of the required core courses can be taken online.

- The Delaware Board accepts most nationally approved courses from the NCBTMB and the AMTA at renewal. However, the Board has the authority to reject a course that does not meet requirements. If you take a course that is not nationally or DE Board approved or think the Board may not accept a course, submit an application, along with supporting documents, to the Board for approval before renewal. For an application, click [Application for Approval of Continuing Education](#).
- Make sure that you receive a certificate for all of the CE courses that you take. Keep them in a safe place so you can present them if you are selected for an audit. However, do not send copies of your certificates to the Board office unless you receive an Audit Notice. You must also keep your CPR current at all times.

Information for CE Providers

Delaware Massage Practitioners heavily rely on this list to find continuously offered and approved courses in Delaware for their renewal requirements.

If your courses are NCBTMB-approved, you do not have to submit them for approval, but you can submit them to be on this master list. Please put the NCBTMB provider number on the certificates issued.

Approved CE courses remain approved until the end of the current license period on August 31 of the next even year. However, please notify the Board office by email or mail if you:

- Change your contact information
- Change a course title or instructor
- Close your business or stop offering a course

It is not necessary to report changes in the course dates or locations as those details are not on the web page.
